

DAB PEN FILLER METAL FEEDER

- **Made from high grade aluminum**
- **Automatically adjusts to tig wire diameter (.030" to 1/8")**
- **Smooth feed wheel for easy control**
- **High temp o-rings for durability**

USER INSTRUCTIONS

Hold the unit like you would a pencil, except you may wish to extend your fingers somewhat and let the back of the unit lay in the "v" formed by the thumb and index finger. Insert the wire from the back never from the front. Use any diameter wire from .030 to 1/8" in any material. Position the unit comfortably in your hand and advance the wire by rolling the rubber wheel with the tip of your index finger. Do not touch the smooth aluminum wheel during use.

PN: BDWA-DABPEN
