

# BS85AR580DF

## Argon Regulator with Dual Flowmeter CGA-580

### Features

- Capable of monitoring two separate gas flow settings at the same time.
- Calibrated for argon, helium and 75% argon / 25% CO2 mixed gases.
- Backpressure-compensated dual flowmeters ensure accurate readings when line restrictions are met.
- Impact-resistant hood and polycarbonate flow tube guarantee extensive durability and longevity.
- Regulator is preset at 50PSIG.
- Body machined from class "A" brass.
- Blue Star products contain copper threading and are made from complete solid bar stock where applicable
- Parts are Victor Compatible

### Technical Specifications

- **Material:** Brass, copper
- **Color:** As pictured
- **Size:** 2" gauge
- **Weight:** 3.75 lbs
- **Packaging:** Individually boxed, 8 boxes/case
- **Country of origin:** China
