

## CC408

### 8" C-Clamp

#### Features

- Heavy Duty Casted C-Clamp
- Anti slip protection features
- Copper plated spindle for spark protection

#### Technical Specifications

- **Material:** Drop forged, powder-coated steel
- **Throat Depth:** 5"
- **Jaw Opening:** 0-8"
- **Spindle Diameter:** 3/4"
- **Clamping Force:** 6900 lbs
- **Clamping Torque Capacity:** 6900 lbs
- **Weight:** 14.09 lbs
- **Packaging:** 5 per box
- **Country of origin:** India

#### Applications

- Welding
- Construction
- Automotive
- Manufacturing

#### Usage Instructions

- Place the pieces you want to hold together in the desired alignment.
- Select a c-clamp that fits the size of your workpieces and has the appropriate throat depth
- Position the c-clamp around the joint area, ensuring the clamp pads make contact with both workpieces.
- Turn the clamp's screw clockwise to secure the workpieces together. Apply enough pressure for a firm hold but avoid excessive force.
- When done, turn the clamp's screw counterclockwise to release the pressure.
