

INFRATHERMWITHSTAND

Motion Activated Infrared Non-contact
Body Thermometer with Stand

Features

- 0.5 Second Quick Measurement
- ± 0.2 °C High Accuracy
- Can display temperatures in °C or °F
- Alarm Function if measured temperature crosses your desired threshold
- Energy Efficient: One Week Standby on battery power
- Portable with included tripod stand
- Charge via included micro-USB cable

Applications

- Home
- School
- Workplace
- Public Places
- Events
- Helps to prevent spread of viruses and bacteria

Technical Specifications

- Material:** ABS
Accuracy: ± 0.2 °C
Display: Digital display
Thermometer Size: 6.7" H x 4.5" W x 5.5" D
Tripod Stand Size: 26" Min height, 78" Max height
Response time: 0.5 seconds
Alarm mode: Abnormal automatic alarm, flash beep
Measuring distance: 2"-4" (automatic measurement)
Standby mode: non-working time 5s standby, red dot dynamic cycle
Installation method: top-mount on tripod
Operating temperature: 50 °F - 104 °F (recommended 60 °F - 95 °F)
