

# BERNARD® CENTERFIRE® CONTACT TIPS

**Tapered and Standard  
MIG Contact Tips**

## Features

- Hardened copper design allows 30% longer than traditional soft copper MIG parts
- The loosening vibration design causes cooler temperature, reducing wear and extending consumable life
- Greater surface area between the contact tip, retaining head and neck
- Locking feature prevents contact tip and retaining head from overheating
- Dual-lead thread design allows contact tips to be rotated 180° to a new wear position
- Increased productivity due to less frequent consumable changes
- Mig Star Consumables come in premium resealable packaging. No More Lost Part Headaches!
