

SSG402P

Sand Star Angle Grinder,
4 1/2", 12-amp

Features

- More powerful than most leading grinders (11A) - 12A & 1400W to grind and smooth out the toughest surfaces
- Variable speed grinder for use on all types of projects or jobs, set between 3000-10000 rpm; compared to fixed rpm setting on leading competitor grinders
- 10% lighter, at 4.5lbs, easier to handle than most leading competitor grinders
- Newly designed side handle provides excellent ergonomics
- Quick Connect Cover guard to shield from dust & other flying debris
- Prevent accidental starts: lock-on equipped for added user safety. Also available without a lock
- Accepts 5/8-11" abrasives

Applications

- Grind/smoothen the toughest surfaces & ferrous metals like: iron, steels, welds, rebar, aluminum, high alloys, stainless, and other dense materials alike
- Used in variety of industries and jobs, such as: knifemaking, auto bodywork, welding, carpentry, masonry, cutting tile, ceramic, and manufacturing

Technical Specifications

- **Amperage:** 12-amp AC/DC
- **Diameter:** 4 1/2"
- **Max RPM:** 10000
- **Weight:** 4.5 lbs.
- **Packaging:** One per pack

Usage Instructions

- Ensure the use of appropriate safety & protective measures are in place in working environment
- Grinder uses a spanner wrench design for easier swapping of the abrasive wheel
- Lift with side handle and use the grinder from the edge
- Switch grinder on, and let it come to desired speed before use
