Heavy Duty Side Access Welding Cabinet

DESCRIPTION

The Heavy Duty Side Access Welding cabinet provides an integrated all-in-one solution for portable welder or plasma cutting applications. It is designed for the welder or plasma cutter to sit on top of the cabinet. This cabinet includes two cabinet doors that open to a 26" x 14" x 18" cabinet for storing those larger items such as welding helmets, wire spools, or protective gear. The two drawers measure 23" wide and are 13-1/2" deep for plenty of storage for your welding tools and consumables. Both drawers and the cabinet doors are lockable for extra security. The top shelf is 15 inches wide and 26-1/2 inches deep and is 33 inches from the floor. This is a good working height and is ample space for most brands of MIG, TIG or Plasma Cutters. With this Heavy Duty capacity, you can store up to 10 inch diameter bottles in the cylinder rack and have a maximum load capacity of 400 lbs.

Order Part Number: **DWC3**
